

//Lab 1. CG program to create a chess board

```
#include <graphics.h>
#include <conio.h>
#include <stdio.h>
int main()
{
    int gd = DETECT, gm;
    int x, y;
    int size = 50;
    initgraph(&gd, &gm, "C:\\Turboc3\\BGI");
    for (x = 0; x < 8; x++)
    {
        for (y = 0; y < 8; y++)
        {
            if ((x + y) % 2 == 0)
                setfillstyle(SOLID_FILL, WHITE);
            else
                setfillstyle(SOLID_FILL, BLACK);
            bar (y * size, x * size, (y + 1) * size, (x + 1) * size);
        }
    }
    getch();
    closegraph();
    return 0;
}
```
